

MIRAI 2024-2026

MIRAI is a collaboration between 17 Swedish and Japanese universities, that aims to strengthen long-term research collaboration and to promote Sweden and Japan as nations of world-leading large-scale research infrastructure by:

- Setting up 4 Global Challenges Teams where researchers from MIRAI universities work together across and beyond institutions, countries, disciplines and sectors.
- Creating an environment to promote strong and long-lasting research collaborations.
- Facilitating Early Career Researcher's mobility.
- Promoting innovation and entrepreneurship in education and research and facilitate joint efforts between academia, industry and external partners.
